BALTIMORE.

A FEW

Practical Hints on Orchid Culture.

No lover of flowers, who has ever seen a good collection, or even a few well-grown Orchids in bloom, but must have been struck with their wonderful beauty. A further acquaintance with them would have shown that many possessed exquisite odors, and that the bloom in many kinds lasted from two weeks to two months.

The cultivation of this beautiful class of plants has been retarded by two causes—first, their cost; and secondly, the supposition that they were difficult to cultivate. Owing to their great and increasing popularity, immense importations have brought their prices down; and, in purchasing, the buyer should remember that instead of needing new plants every year, these if well grown increase in value faster than any other class of plants. With regard to culture, the great bulk are as easily grown as geraniums or heliotrope—and require far less work, but a little more knowledge. There are species that have proven somewhat difficult of culture, *but all* Lælias, Oncidiums, Cattleyas, Lycaste, Stanhopeas, and many others, can be cultivated in any house where Heliotrope is grown in the winter, and where the thermometer is kept down by shading and syringing as low as possible during the hot months of June, July, August and September.

The East India Aerides, Vandas, etc., and the Odontoglossums from the cool mountains of New Grenada we would not recommend to any beginner in Orchid Culture. Any one who has a fair selection of Lælias, Lycastes, Oncidiums, Cattleyas and Dendrobiums will never be without bloom from January to June

Nearly all the plants in the following list make their growth between May and October. Some make their bloom immediately with their new growth; others after it is finished; but all need a season of rest after their growth is finished, and this rest is brought about by placing them in a cooler, dryer and less shady situation. This change must not be too sudden, and the quantity of water given reduced gradually.

Through the dull winter months, November, December, January and February, give the plants plenty of sun, at the same time merely enough water not to let the bulbs shrivel; by this they will harden their growth and lay up a supply of concentrated sap to start them into growth and bloom.

No one can grow Orchids by keeping them always in a moist and shady place Great care must be taken to see that they are kept clean of insects.

Growing orchids on blocks or in baskets is a much safer way for beginners than in pots, and where only a few dozen are grown, if hung together, it is only a few minutes' work to dip the blocks in water for a minute some two or three times a week. This plan also preserves them from the attacks of their greatest enemy—the snail—and enables the grower to hang them among the branches of large plants in the conservatory or greenhouse, thus giving it the appearance of a natural tropical forest. The house in summer must be kept moist, but wherever Begonias and other foliage plants grow well the most of the Orchids in this list will grow and bloom.

We would say that no particulas education is necessary. We have grown Orchids for the last 10 or 12 years, not by the dozen, but by the thousand, mixed up with Ferns, Palms, Dracenas, Cacti and every other species of green and hot house plants. We have them growing in pots, baskets of wood or pottery: also on cocoanut husk, burnt clay slabs and wood of several kinds, viz: cypress, cedar, locust and walnut, and some on wood from their native forests. The secret does not lay in **on what** you grow them so much as in **how** you grow them. The only trouble experienced by **successful** Orchid growers is that they lose interest in all other plants.

We have thought proper to add a brief description of the more prominent varieties of Orchids, which will be found in the list. We also affix a few letters to designate the temperature the varieties thrive best under.

All who wish to become more intimately acquainted with Orchids will find every needed assistance, advice and detailed explanations of everything pertaining to Orchids, including descriptions of all leading varieties in "William's Orchid Grower's Manual, orders for which we fill at lowest price.

We are continually receiving large lots of Orchids, among which are often some fine clumps of Laelias, Cattleyas, Dendrobiums, etc., etc., which we can sell very cheap. Among our Cattleyas are several kinds not named, large plants, which we will sell at very moderate rates.

Our prices are as low as any Orchid grower has ever offered. We send out only **good plants,** established in baskets, pots or on blocks. We guarantee to give entire satisfaction.

In ordering, write name in full, Post Office, Express Office, and—if a large order in summer—Freight Office. Always give as minute instructions as to route, &c. as possible, as great trouble is often saved by a minute spent in that way

Make all P. O. and Express Money Orders as well as Registered Letters payable in Baltimore, Md.

In case we are short of any part of an order we will write for instructions before shipping, unless advised of any acceptable substitute in the order.

Always send remittance with order, unless satisfactory references are furnished. C. O. D orders should be accompanied by 25 per cent. of probable cost.

No charges for boxing or packing. Free on board cars in Baltimore.

DURABILITY OF ORCHID BLOOMS.

This, one of their greatest attractions is fully illustrated in the "Orchid Manual" by the experience of Mr. Skinner with the Lycaste named after him, L. Skinnerii He says:

"On the 2d February I received a fine specimen with seven flowers out, and placed it on the drawing-room table in an ornamental pot, and gave it every three days or so about four tablespoonfuls of water, occasionally wiping the leaves with a wet sponge when dust got on them. There it stood through the severe weather we had, a fire in the room only during afternoons and evenings; on some days none at all It did not show the least decay until the 16*th of May* when it was for some purpose or other put into the greenhouse, and our gardener sprinkled water over it along with the other plants. Next morning I was shocked to see the flowers all with brown spots and withering. On May 18 I took it back to the gentleman from whom I received it, still in full bloom, and it lasted—though then much injured—a week on the stand by the seed room in his place."

In order to make our new friends better acquainted with this truly beautiful class of plants and accustom them to their really simple culture, we have decided to make the following collections—easiest of culture, suitable for an ordinary greenhouse having a temperature of from 45° to 60° at night during coldest weather.

This will be found by far the better way for any one unacquainted with Orchids to order, as by writing us when they want flowers (winter or summer) place in which they expect to grow them and the temperature that can be maintained both winter and summer, and any other points they may think of, we can so modify collections as to suit their individual taste or opportunities.

Do not think that because an Orchid is not high-priced it is necessarily a small dull-flowered variety or a weak, sickly plant. Some of the most beautiful flowers in the family are found among the plants which have been most freely imported, and are consequently cheapest; and a $1 00 plant of a popular variety will be just as large and healthy as a plant costing $50 or $100 of the kinds of which only a few have or can be imported.

No. 1.

Cattleya Mossiae.
Laelia Autumnalis.
" Albida.
Cyprepedium Venustum
Dendrobium Wardianum.
Sobralia Marcantha.
Oncidium Ornithorynchium.
Stanhopea Occulata.
Lycaste Aromatica.
Odontoglossum Grande.
Phajus Grandifolius.
Trichopilia Crispa.

No. 2.

Cattleya Percivaliana.
Laelia Anceps.
Chysis Aurea.
Dendrobium Nobile.
Maxillaria Picta.
Cyprepedium Insigne.
Odontoglossum Citrosmum.
" Rossii.
Tricopilia Suavis.
Lycaste Skinnerii.
Oncidium Incurvum
Stanhopea Graveolens.

Either collection for $10.00, or the two comprising 24 different varieties for $19 00.

100 Plants in 100 varieties blooming plants, $100.
100 Plants in 100 varieties, second size, $75.

S—Distinguish the Stove or Hot House kinds.
C— " Cool "
I— " Intermediate or Green House kinds.

Those marked * are Winter bloomers.

PRICE LIST.

Acineta.—An Evergreen Orchid, with short pseudo-bulbs, leaves about 1 foot high.

I	Barkeri (Peristeria Barkeri)	Mexico	$2 00
I	Humboldtii	Columbia	2 00

Acropera.—A peculiar genus, long raceme, with 12 to 20 flowers.

I	Loddigesii	Mexico	1 00
I	Luteola	Mexico	1 50

Ada.—A very showy genus, compact growth, spike drooping.

C	*Aurantiaca	New Grenada (Winter).	50 to 1 50

Aerides.—The species of Aerides are among the most beautiful of Orchids; ornamental foliage; lovely flowers

S	Affine	Sylhet	2 50 to 5 00
S	Crassifolium	Burmah	2 50
S	Crispum	Courtallum	2 50 to 5 00
I	Fieldingi	East Indies	2 50 to 5 00
C	Japonicum	Japan	2 00
S	Leeanum	East Indies	2 50 to 5 00
S	Lobbi	Moulmein	2 50
S	Odoratum	East Indies	2 00 to 5 00
S	" Majus	East Indies	2 50 to 5 00
S	Quinquevulnerum	Manilla	2 50 to 5 00
S	Roseum	Bombay	2 50 to 5 00
S	Virens	Java	2 50 to 5 00
S	" Ellisii	Java	5 00
S	Warnerii	Bombay	2 50 to 5 00

Angraecum.—An Evergreen Orchid of showy appearance, lasting a long time in bloom.

S		Citratum	Madagascar	3 00
S	*	Eburneum	Madagascar	2 50 to 5 00
C		Falcatum	Japan	1 50

ANGRAECUM SESQUIPEDALE.

Angraecum.—*Continued.*

S		Superbum	Madagascar	5 00
S	*	Sesquipedale	Madagascar	10 00
S	*	Virens	Madagascar	5 00

Anguloa.—A beautiful Orchid from Columbia; lasts a long time in flower.

I		Clowesii	Columbia	2 00
I		Uniflora	"	2 00

Arpophyllum Graceful foliage, evergreen; long spikes of flowers.

I	*	Cardinale	Mexico	50 to 1 00
I		Giganteum	Mexico	75 to 1 50
I	*	Spicatum	Mexico	50 to 1 00

Barkeria.—A deciduous Orchid: small growth; flowers rich and delicate.

C	* Elegans	Mexico	1 00 to 2 00	
C	* Skinnerii	Guatemala	2 50	
C	Spectabilis	Guatemala	2 50	

Bletia.—A terrestial Orchid of easy growth, lasting a long time in bloom.

C	* Hyacinthiana	China	1 50	
I	* Patula	Jamaica	1 50	
I	* Sheperdii	West Indies	1 50	
I	Sanguineus	"	2 00	
I	* Tankervilla (Phajus Grandifolius)	China	50 to 1 00	

Brassavola.—An easily grown Orchid.

I	Cuspidata	Mexico	2 00	
S	* Digbyana	Honduras	2 00	
I	* Glauca	Mexico	2 00	
I	Grandiflora	"	2 00	

Brassia.—Somewhat like Oncidiums, long evergreen foliage; last long in bloom.

I	Gireoudiana	Costa Rica	5 00	
C	Verrucosa (Viridis)	Mexico	50 to 1 00	
I	Maculata	Jamaica	2 00	

Burlingtonia.—A compact growing Orchid, flowers drooping, very delicate fragrance.

I	Fragans	Brazil	2 50	
I	Venusta	Brazil	5 00	

Calanthe.—A handsome, free flowering Orchid, producing long sprays of beautiful flowers.

I	* Textori	Loochoos	1 50 to 2 00	
I	* Veitchii	Hybrid	1 00 to 2 00	
I	* Vestita Nivalis	Borneo	1 50	
I	* Lutea Occulata	"	1 50	
I	* Rubra	"	1 50	
I	* Regneri		1 50	

Cattleya.—The finest genus among Orchids, giving more beautiful flowers than any other; easy growth. Our collection is very large.

I		Acklandiae	Brazil	3 00
I		Amethystina	Brazil	2 50
I		Amethystoglossa	Brazil	3 00
I		Aurea	Columbia	4 00
I	*	Bowringeana	Guatemala	1 50 to 2 00
I		Bicolor	Brazil	5 00
I		Chocoensis	Columbia	3 00
C		Citrina	Mexico	50 to 1 00
I		Crispa	Brazil	3 00
I		Dolosa	Brazil	2 50
S		Dowiana	Costa Rica	2 50
S		Earnestii		2 50
I		Eldorado Splendens	Brazil	2 00
I		Forbesii		2 50

CATTLEYA GIGAS.

I		Gigas	Columbia	2 00 to 5 00

Cattleyas.—*Continued.*

I	Gaskeliana	Brazil	1 50	
I	Guttata Leopoldii	"	3 00	
I	Harrisoniana	"	2 00	
I	Imperialis	"	2 50	
I	Intermedia	"	1 00	to 2 50
I	Labiata	"	2 00	
I	Lemoniana	Caraccas	2 00	
I	Leeana		3 00	
I	Leopoldii	Brazil	2 50	
I	Loddigesii	"	2 50	
I	Luddemanniana	Caraccas	2 00	
I	Marginata	Oaxaca	2 00	
I	* Maxima	Columbia	2 00	
I	" Backhousei	Columbia	3 00	
I	Mendelii	Brazil	1 00	to 2 50

CATTLEYA MOSSIAE.

I	Mossiae	La Guayra	50	to 5 00
I	Percivaliana	Brazil	1 50	to 5 00
I	Perrinii	"	2 50	
I	Pinnella	"	2 50	
I	Roezlii	Caraccas	3 00	
I	Schilleriana	Brazil	2 50	

Cattleyas.—*Continued.*

I	Skinnerii	Mexico		2 50
I	Speciosissima	Caraccas		2 00
S	Superba	Guiana		2 50

CATTLEYA TRIANÆ.

I	* Trianæ	New Grenada	1 50 to 3	00
I	Walkeriana	Brazil	2 50	
I	Warsewiczii	Columbia	2 00 to 5	00
I	Warnerii	Brazil	2 50	

Chysis.—A deciduous Orchid, having long spikes of very pretty flowers; easily grown.

I	Aurea	Venezuela	2 50
I	Maculata	Mexico	2 50

Chysis.—*Continued.*

I	Bractescens	Guatemala	2	00
I	Laevis	Guatemala	2	50
I	Limninghii	Guatemala	5	00

Cœlogyne.—An evergreen Orchid, of low growth; lovely flowers.

I	* Cristata	Nepaul	1 00 to 3	00
I	* Flaccida	Assam	2	00
I	* Ocellata	Assam	2	00
I	Parishii	Burmah	2	50
I	* Speciosa	Java	2	00
C	**Colax.**—Jugosus	Brazil	2	00
I	**Comparettia.**—Falcata	Peru	2	00
I	Rosea		2	00
C	**Coelia.**—Macrostachia	Guatemala	50 to 1	00

Cycnoches.—The Swan Orchid. A peculiar flower; rich color.

I	Aureum	Central America	2	50
I	Ventricosum	Guatemala	2	50

Cymbidium.—An evergreen Orchid, with short bulbs.

I	Aloifolium	East Indies	1	00
I	* Eburneum	East Indies	2	50
I	* Giganteum	Assam	5	00
S	* Lowianum	Burmah	5	00
S	Longifloru n	East Indies	5	00
I	Sinensis	China	3	00

Cyprepedium.—The Lady Slipper Orchid. This genus is very odd in its foliage and flowers; many varieties having beautifully mottled foliage.

I	* Argus	East Indies	2	00
I	Barbatum	Malacca	1	00
C	Boxalli	Burmah	2	50

Cyprepedium.—*Continued.*

I	Concolor	Moulmein	3 50	
I	Callosum			
I	Caudatum	Peru	5 00	
S	Ciliolare	East Indies	2 00	
C	* Harrisianum	Hybrid	2 50	
S	Hookerii	Borneo	3 00	
C	Insignie	Nepal	50	to 1 00
C	Maulei	Nepal	5 00	
S	Lawrencianum	Borneo	1 50	to 3 00
S	Lowii	Borneo	2 50	
S	Niveum	East Indies	2 00	
S	Parishii	East Indies	2 00	
S	Selligerum			
C	Sedeni	Hybrid	2 00	
S	Spicerianum	East Indies	2 50	to 5 00
S	Stonei	Borneo	2 50	
I	Veitchianum	Java	5 00	
C	* Venustum	Nepal	50	to 3 00
I	Vilosum	Moulmein	2 50	

Crytopodium.—A large growing Orchid, producing large spikes of flowers.

I	Andersonii	Brazil	2 50	
I	Punctatum	Brazil	2 50	

Cyrtochilum.—(Oncidium.)

C	Flavescens	Mexico	2 00	
C	* Maculatum	Mexico	1 50	

Dendrobium.—Next to the Cattleyas and Lælias, this genus is the most magnificent of Orchids, blooming so easily and so abundantly.

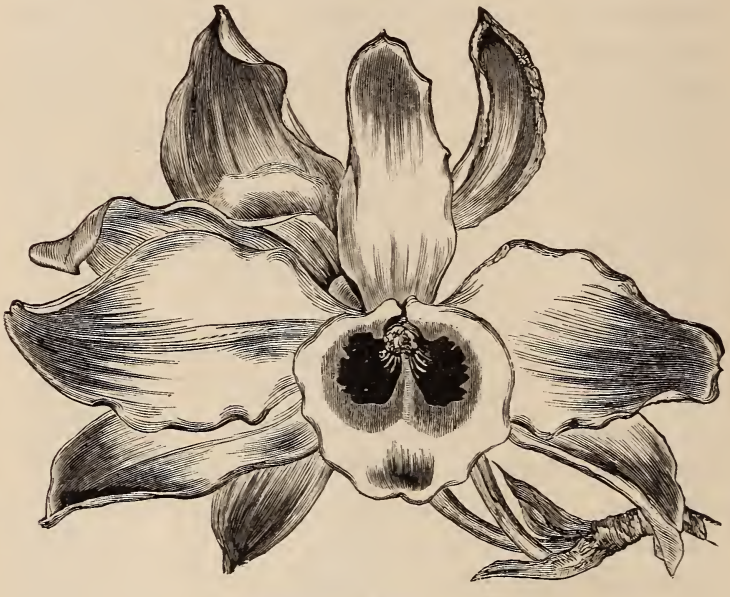
I	Aggregatum	East Indies	2 50	
I	Alba Sanguinea	Moulmein	2 50	
S	Bensonii	East Indies	2 50	
S	Bigibbum	Torres Straits	2 50	
S	Brymerianum	Burmah	2 00	to 5 00

Dendrobium.—*Continued.*

I		Calceolaria	India	2 00
I		Cambridgeanum, (Ochreatum)	Chittagong	2 50
S		Cariniferum	East Indies	1 50
S		Crepidatum	India	1 50
I		Chrysanthum	Nepal	2 50
S	*	Chrysotoxum	East Indies	1 00 to 2 00
S	*	Crassinode	Siam	75 to 2 00
S	*	" Barberianum	Moulmein	75 to 2 00
S		Cretaceum	Burmah	2 00
S		Crystallinum	Arracan Mountains	2 50
S		Cruentum	East Indies	1 50
S		Dalhousianum	East Indies	2 50
S		Dearei	Philippine Islands	2 00
I		Densiflorum	East Indies	2 50
I	*	Devonianum	Moulmein	2 50
S		Eburneum, (Draconis)	Moulmein	2 50
I		Falconeri	East Indies	2 00 to 4 00
S		Farmeri	India	2 50
I		Fimbriatum Oculatum	Nepal	2 50
S		Formosum	Burmah	1 50
I		Heterocarpum, (Aureum)	East Indies	2 50
S		Infundibulum	Moulmein	2 50
S		Jenkinsii	Assam	2 00
I		Lituiflorum	East Indies	2 50
S		Macrophyllum	Manilla	1 50
S		Moschatum	East Indies	1 50
I	*	Nobile	Assam	50 to 3 00
I		Nodatum, (Aphrodite)	Moulmein	2 50
I		Parishii	Moulmein	1 00 to 2 00
I	*	Pierardi	India	1 00 to 2 00
I	*	Latifolium	India	2 00
I	*	Primulinum	East Indies	2 50
S	*	Pulchellum	India	2 50
S	*	Superbiens	Torres Straits	5 00

Dendrobium.—*Continued.*

S		Suavissimum	Burmah	1 50
S	*	Secundum	Java	2 50
S		Tortile	East Indies	2 50
S		Thyrsiflorum	East Indies	50 to 5 00



DENDROBIUM WARDIANUM.

S	*	Wardianum	India	1 00 to 2 00

Dendrochilum.—(Platyclinis.)

I		Glumaceum	East Indies	2 00

Disa.—Tall growing Orchids, blooming at top of the growth.

C		Grandiflora	Cape of Good Hope	2 50

Epidendrum.—An extensive genus of free-flowering Orchids, very easily cultivated. E. Vittellinum should be in every collection on account of its bright colored flowers and profuse blooming.

C		Aromaticum	Brazil	2 00
C		Brassavolvæ	Central America	2 50
C		Cinnabarinum	Pernambuco	1 50
I		Ciliatum	Central America	2 50

Epidendrum.—*Continued.*

C	Cochleatum	Central America	50	to 1 00
I	Dichromum	Bahia	2 50	
C	Ellipticum	Central America	2 00	
I	Fragans	Brazil	1 00	
I	Macrochilum Roseum	South America	1 50	
I	Nemorale	Mexico	2 00	
I	Oncidoides	Mexico	2 00	
I	Primulinum	South America	1 50	
I	Prismatocarpum	Chiriqui	2 00	
C	Vitellinum	Mexico	75	to 1 00
C	Majus	Mexico	1 00	to 2 00

Gongora.—An interesting Orchid, with long sprays of flowers. Easily grown.

I	Atro-purpurea	West Indies	1 50	
I	Maculata	Demerara	1 00	

Laelia.—A profitable Orchid for the cut-flower man, producing abundance of lovely flowers; and very easily grown.

C	* Acuminata	Mexico	2 50	to 5 00
C	* Albida	Guatemala	50	to 1 00
C	* Albida Rosea	Guatemala	1 00	to 2 00
C	* Anceps	Mexico	1 00	to 5 00
	* " Alba	Mexico	5 00	
C	* Autumnalis	Mexico	1 00	to 5 00
	* " Atrorubens	Mexico	1 50	
I	Crispa	Brazil	3 00	
I	* Dayana	"	2 50	
I	Elegans	"	3 00	
I	* Flava	"	2 00	
I	* Furfuracea	Mexico	3 00	

LAELIA ANCEPS.

Laelia.—*Continued.*

I	* Harpophylla	Costa Rica	2 00	
C	Majalis	Oaxaca	1 00	to 2 50
I	Perinii	Brazil	2 50	
I	Purpurata	"	1 00	to 5 00
I	Ellisii	"	2 00	to 5 00
C	* Peduncularis	Mexico	25	to 1 50
I	* Superbiens	Guatemala	2 50	to 5 00
I	* **Leptotes**—Bicolor	Brazil	1 00	

Limatodes.—A beautiful Orchid that blooms in mid-winter. Great diversity of colors among the plants

I	* Rosea	Moulmein	1 00	to 2 00
I	**Liparis.**—Pendula	India	1 00	
I	**Lissochilus.**—Dilectus	Africa	1 00	

Lycaste.—A free flowering terrestial Orchid. Should be in every collection. Grand for cut flowers, large, beautiful and wonderfully lasting. L. Skinnerri, (the monk Flower,) contains a lifelike monk or hermit at his devotions.

C	* Aromatica	Mexico	1 00 to 2 00
C	* Cruenta	Guatemala	1 00 to 5 00
C	* Deppei	Mexico	75 to 1 50
C	Harrisoniae		2 00
I	Lanipes	Guayaquil	2 00
C	* Skinnerii	Guatemala	1 00 to 2 00
	" Alba		15 00 to 75 00
I	Suaveolens	Mexico	2 50

LYCASTE SKINNERII.

Masdevallia.—A very interesting and curious genus, with highly ornamental flowers thrown well above the foliage.

C	Bella	Columbia	3 00
C	Chimera	New Grenada	5 00
C	Davisii	Peru	2 00
C	Maculata	New Grenada	2 50
C	Harryana, (Lindeni)	New Grenada	2 00
C	Reichenbachiana	Costa Rica	5 00
C	Tovariensis	Columbia	2 00
C	Veitchiana	Peru	2 00
C	Wageneriana	Central America	1 50

Maxillaria.—A genus of Orchids not much prized, although bearing very fragrant flowers.

I	Grandiflora	Peru	2 50
I	Picta	Brazil	2 00
I	Nigrescens	New Grenada	2 00

Mormodes.—A deciduous Orchid; from the strange appearance of blossoms, called the Goblin Flower.

I	Citrinum	Mexico	2 00
I	Pardinum	Mexico	2 00
I	Unicolor	Mexico	2 00

I **Miltonia.**—Regnelli 1 00

Odontoglossum.—A genus much prized for their beautiful flowers, which, however, in some C. varieties are hard to obtain owing to our great heat. They are truly grand when successfully grown.

C	* Alexandræ (Crispum)	New Grenada	1 00 to 2 00
I	* Bictoniensis	Guatemala	1 50 to 2 50
I	* Cervantesii	Mexico	75 to 1 50

ODONTOGLOSSUM ALEXANDRÆ.

Odontoglossum.—*Continued.*

I		Cordatum (Hookerianum)	Mexico	1 00 to 2	00
C		Cirrhosum	Ecuador	1 50 to 2	50
I		Citrosmum	Mexico	50 to 3	00
I		" Roseum	Mexico	1 50

A price list of which will be mailed free to all applicants.

Prices of large specimen Palms, Ferns, Ficus, Cycas, Agaves, &c., will be cheerfully given if requested.

A FEW KIND REMARKS

Selected from Our Correspondence.

MONTREAL, August 30, 1889.

GENTLEMEN.—I have much pleasure in letting you know that the box of Orchids came to hand in splendid condition last night. I may also say that for the last 15 years I have been getting plants from the States, but never got any put up in as proper a shape as this lot. Please send me your catalogue of fancy plants. Yours truly,

A. COWPER.

ERIE, PA., January 15th, 1890.

Messrs. Brackenridge & Co.

I write to acknowledge the receipt of Orchids sent. They came in excellent condition and were a surprise, as I did not expect plants ready to bloom. If I am at all successful, or get the craze, shall send for more from time to time. Very truly,

MRS. J. F. DOWNING.

NORWALK, OHIO, October 29, 1888.

Brackenridge & Co

I received the Orchids and was much pleased with them ; they were much larger than I expected they would be. Send me one of your new Catalogues of Orchids. Many thanks for your promptness.

Yours respectfully,

THEO. GAMBLE.

Post Box 467, Norwalk, Ohio.

ALEARENTA, Dec. 7, 1888.

Brackenridge & Co.

GENTLEMEN.—Shipment of Orchids arrived in good time and in good condition ; the packing was perfect. Have you William's Manual and at what price. Very respectfully,

H. P. BLACQUEEN,

Charleston, S. C.

ATTICA, N. Y., April 9, 1888.

Messrs. Brackenridge & Co.

SIRS.—"Orchids" arrived to-day in fine condition, not wilted. Thanks for Lycaste, in blossom. Yours, &c.,

J. H. BUTTON,

NYACK, Nov. 27th, 1888.

Messrs. Brackenridge & Co., Govanstown, Md.

DEAR SIRS.—I received the Orchids in splendid condition, and thank you for care and taste you gave to them.

Respectfully yours,

JACOB MENDEL.

SOUTH HAVEN, MICH., June 8th, 1889.

Messrs. Brackenridge & Co.

SIRS.—The Orchids arrived this morning in a very nice condition, just got them unpacked They are so nice; and thanks for the extras.

Yours truly,

MRS. A. W. BENSON.

PEMBROKE, ONT , October 22d, 1889.

Messrs. Brackenridge & Co.,

Rosebank Nurseries, Govanstown, Baltimore Co., Md.

DEAR SIRS —The package of Orchids sent by Express to Mrs. Deacon, came to hand in good order and condition, and we are well pleased with their appearance. Yours very truly,

THOMAS DEACON.

NEW ORLEANS, LA , April 4, 1889.

Brackenridge & Co., Govanstown, Md.

DEAR SIRS.—The Orchids arrived safe, and very well pleased with them. I hope I will give you another order soon.

Yours very truly,

H. A. DESPOMMIER.

MIDDLEBOROUGH, MASS , July 20th, 1888.

Messrs. Brackenridge & Co.

GENTLEMEN.—The plants arrived in good condition last evening. They are very satisfactory, and I enclose check in payment.

Yours very truly,

E. S. HATHAWAY.

CLINTON, Mo., April 15, 1888.

Messrs. Brackenridge & Co.

The Orchids were received to-day in fine order.

Yours truly,

M. L. BONHAM.

OAKLAND, CALIFORNIA, Sept. 9, 1888.

Messrs. Brackenridge & Co.

DEAR SIRS.—I received the Plants in good order. I am thankful for the number and also the good strong plants. I did not have much time to write a long letter. I will soon get more Orchids.

Yours truly,

F. W. N.

SHARON HILL, Sept. 24, 1889.

Messrs. Brackenridge & Co.

Please accept my sincere thanks for your prompt attention to my little order, and for sending such good specimens.

Yours truly,

M. B. C.

PITTSBURGH, December 7th, 1888

Messrs. Brackenridge & Co.

GENTLEMEN —Received the "Orchids" all O. K. some time ago, and am well pleased with them. Could you send me another colored picture of Orchid, I spoiled the last one when I opened your Catalogue, I wish to get it framed.

Yours respectfully,

SCOTT, POTH & CO.

MILWAUKEE, WIS., May 27, 1889.

Messrs. Brackenridge & Co.

DEAR SIRS.—Orchids arrived in good order; plants all nice.

Yours truly,

CHS. HOPPENRATH.

WALLA WALLA, W. T., June 19th, 1889.

Messrs. Brackenridge & Co.

GENTS.—Received invoice of Orchids two days ago in good condition.

MRS. OSCAR GRUNERT.
